Manufacturer Product Information

Manufacturer	Model	Type
ALS	ALST460 Tactical Blast Strip	Distraction Device

Equipment Description

ALS model ALST460 Tactical Blast Strip is a single use non-bursting explosive remote tactical stun machine containing 26 grams of flash powder that is 3" X 11" in size that is initiated with a 15' electric match and requires an electric initiator.

Equipment Capabilities

Produces approximately 170 dB at 5 ft. and omits 6 - 10 million candela. In addition to the light and sound, the ALST460 produces a significant pressure wave that adds to the disorienting physiological effects.

Purpose of Equipment

Used to temporarily distract or disorient non-compliant subjects who are violent or who demonstrate the intent to be violent and can be used in an attempt to deescalate a potentially deadly situation.

Authorized Equipment Use

Members assigned to the Mendocino County Special Weapons and Tactics Team are authorized to deploy and use the munition in any circumstance where the member can articulate a reasonable expectation that the munition may be needed to distract and/or disorientate a potentially violent or dangerous subject.

Legal and Procedural Rules Governing Use

Mendocino County Sheriff's Office Policy 300 - Use of Force.

Training Requirements

Members must complete manufacturer approved training and agency approved training prior to deployment and use.

Military Equipment Inventory/Acquisition Request Form

☐ **Request for Acquisition of Equipment** ☑ **Equipment Available for Use/Possessed**

Manufacturer Product Information

Manufacturer	Model	Type
CTS	CTS-7290-3	Distraction Device

Equipment Description

This is a non-bursting, non-fragmenting multi-bang device that produces a thunderous bang with an intense bright light. Ideal for distracting dangerous suspects during assaults, hostage rescue, room entry or other high risk arrest situations.

Equipment Capabilities

The 7290-3 Flash-Bang device provides 3 unique flash bang actions within a single hand safe assembly. The device provides arrhythmic outputs approximately 0.5 seconds apart. Unit is designed to be hand safe and provides a physical feature to locate the top and bottom of the grenade when handling.

Purpose of Equipment

Used to temporarily distract or disorient non-compliant subjects who are violent or who demonstrate the intent to be violent and can be used in an attempt to de-escalate a potentially dangerous situation.

Authorized Equipment Use

Members assigned to the Mendocino county Special Weapons and Tactics Team are authorized to deploy and use this munition in any circumstance where the member can articulate a reasonable expectation that the munition may be needed to disorient a potentially violent or dangerous subject or vicious animal.

Legal and Procedural Rules Governing Use

Mendocino County Sheriff's Office Policy 300 - Use of Force .

Training Requirements

SWAT members must complete agency approved training and meet yearly qualification requirements prior to deployment and use.

Manufacturer Product Information

Manufacturer	Model	Type
CTS	CTS-7290M-CI	Distraction Device

Equipment Description

This is a non-bursting, non-fragmenting multi-bang device that produces a thunderous bang with an intense bright light. Ideal for distracting dangerous suspects during assaults, hostage rescue, room entry or other high risk arrest situations.

Equipment Capabilities

7290M – CI The CTS 7290M Mini Flash Bang. Weighing in at just 15 ounces the 7290M is approximately 30% lighter than the 7290 but still has the same 180db output of the 7290 and produces 6-8 million candela of light. The design of the 7290M, incorporates a porting system that eliminates movement of the body at detonation with reduced smoke output and can be command initiated for greater stand off distance.

Purpose of Equipment

Used to temporarily distract or disorient non-compliant subjects who are violent or who demonstrate the intent to be violent and can be used in an attempt to de-escalate a potentially dangerous situation.

Authorized Equipment Use

Members assigned to the Mendocino county Special Weapons and Tactics Team are authorized to deploy and use this munition in any circumstance where the member can articulate a reasonable expectation that the munition may be needed to disorient a potentially violent or dangerous subject or vicious animal.

Military Equipment Inventory/Acquisition Request Form

☐ **Request for Acquisition of Equipment** ☑ **Equipment Available for Use/Possessed**

Manufacturer Product Information

Manufacturer	Model	Type
Bushmaster	XM-15	Short Barrel Rifle

Equipment Description

The Bushmaster XM-15 carbine is an entry level lightweight, gas impingement, air cooled, magazine fed, selectable fire, shoulder fired weapon with a collapsible stock in 5.56 NATO and configured with an 11.5" barrel.

Equipment Capabilities

This is a precision weapon system capable of delivering rounds at greater accuracy and longer distance than a pistol.

Purpose of Equipment

This is an agency approved weapon system utilized by members who are assigned to the Multi-Agency Special Weapons and Tactical Team. Provides the operator the ability to deliver precision shots in order to incapacitate an immediate threat who will inflict or is inflicting great bodily injury or death to another person(s).

Authorized Equipment Use

Assigned Sheriff's Office members may deploy the weapons system in any circumstance where the member can articulate a reasonable expectation that the rifle may be needed.

Legal and Procedural Rules Governing Use

Authorized deployment and use of this weapon system may be within the guidelines established in Mendocino County Sheriff's Office Policy 300 Use of Force and 312 Firearms.

Training Requirements

Members must have successfully completed a California POST Certified Course that satisfies the legislative training mandate to possess and use short barreled rifles specified in Section 33220(b) of the California Penal Code and which meets the POST Commission training requirements specified in POST Commission Regulation 1081. This agency approved training and qualification requirements must be met prior to deployment.

Manufacturer Product Information

Manufacturer	Model	Type
Remington	870	12-Gauge Shotgun

Equipment Description

A 12-gauge pump action shotgun with a magazine tube specifically dedicated to less lethal munition delivery.

Equipment Capabilities

This weapon system is capable of delivering 12-gauge projectiles at great accuracy.

Purpose of Equipment

This system is used to deliver kinetic energy projectiles and/or chemical agent munitions in order to control subjects who are violent or who demonstrate the intent to be violent and when used properly are less likely to result in death or serious physical injury and can be used in an attempt to deescalate a potentially deadly situation.

Authorized Equipment Use

Members assigned to the Mendocino County Special Weapons and Tactics Team are authorized to deploy and use this munition upon authorization of the Shift Supervisor, Incident Commander or Crisis Response Unit ((SWAT) Commander, and only after evaluating all conditions known at the time and determining that such force reasonably appears justified and necessary.

Legal and Procedural Rules Governing Use

Mendocino County Sheriff's Office Policy 300 Use of Force and 308 Controlled Devices and Techniques.

☐ **Request for Acquisition of Equipment** ☑ **Equipment Available for Use/Possessed**

Manufacturer Product Information

Manufacturer	Model	Type
Defense Technology	1026	CS Canister

Equipment Description

Consists of three separate canisters pressed together with separating charges between each. When deployed, the canisters separate and land approximately 20 feet apart allowing increased area coverage of a ortho-chlorobenzalmalonoitrile payload is a short period of time.

Equipment Capabilities

Designed for outdoor use and has fire producing capability. This is a hand thrown canister with a scattering effect and rapid burning of the sub-munition canisters that provide wide area coverage and minimize the throwback potential.

Purpose of Equipment

May be used for crowd control or crowd dispersal.

Authorized Equipment Use

Members assigned to the Mendocino County Special Weapons and Tactics Team are authorized to deploy and use this munition upon authorization of the Shift Supervisor, Incident Commander or Crisis Response Unit ((SWAT) Commander, and only after evaluating all conditions known at the time and determining that such force reasonably appears justified and necessary.

Military Equipment Inventory/Acquisition Request Form

☐ **Request for Acquisition of Equipment** ☑ **Equipment Available for Use/Possessed**

Manufacturer Product Information

Manufacturer	Model	Type
Defense Technology	2260	Ferret Liquid OC 40mm Round

Equipment Description

The Ferret® 40mm Round is a frangible projectile filled with oleo-resin capsicum, a chemical agent that is non-burning and suitable for indoor use. It is designed to deliver the chemical agent in barricade situations from a 40mm launder. Spin stabilization from barrel rifling affords maximum stand-off distance and accuracy for safety.

Equipment Capabilities

Designed to penetrate barriers, such as windows, hollow core doors, wallboard and thin plywood. Upon impacting the barrier, the nose cone ruptures and instantaneously delivers a small chemical payload inside of a structure or vehicle.

Purpose of Equipment

Primarily used to dislodge barricaded subjects from very small confined areas. its purpose is to minimize the risk to all parties through pain compliance, temporary discomfort and/or incapacitation of non-compliant subjects who are violent or who demostrate the intent to be violent and can be used in an attempt to deescalate a potential deadly situation.

Authorized Equipment Use

Members assigned to the Mendocino County Special Weapons and Tactics Team are authorized to deploy and use this munition upon authorization of the Shift Supervisor, Incident Commander or Crisis Response Unit ((SWAT) Commander, and only after evaluating all conditions known at the time and determining that such force reasonably appears justified and necessary.

Defense Technology	56854	40mm Aerosol OC Fogger

Equipment Description

An operator controlled instantaneous initiated aerosol canister with a payload of oleoresin capsicum. It is non pyrotechnic that is not a fire hazard and requires minimal de-containment.

Equipment Capabilities

Designed for indoor tactical operations when a non pyrotechnic instantaneous delivery system is desired. It is most efficient when used in confined areas or deployed close to the target.

Purpose of Equipment

The purpose of the Aerosol Grenade Fogger is to minimize the risks of all parties through pain compliance, temporary discomfort and/or incapacitation and potentially violent or dangerous subjects.

Authorized Equipment Use

Members assigned to the Mendocino County Special Weapons and Tactics Team are authorized to deploy and use this munition upon authorization of the Shift Supervisor, Incident Commander or Crisis Response Unit ((SWAT) Commander, and only after evaluating all conditions known at the time and determining that such force reasonably appears justified and necessary.

Legal and Procedural Rules Governing Use

Mendocino County Sheriff's Office Policy 300 Use of Force and 308 Controlled Devices and Techniques.

Training Requirements

Members must have successfully completed agency approved training and meet the qualification requirements prior to deployment and use.

Military Equipment Inventory/Acquisition Request Form

☐ **Request for Acquisition of Equipment** ☑ **Equipment Available for Use/Possessed**

Manufacturer Product Information

Manufacturer	Model	Type
Defense Technology	6172	40mm Skat Shell

Equipment Description

The 40mm Skat Shell® incorporates an aluminum shell and utilizes black powder as a repellent. The 40mm Skat Shell® contains four (4) separate sub-munitions filled with ortho-chlorobenzalmalonoitrile that function individually once the round is discharged from a 40mm launcher down range to the intended targeted zone.

Equipment Capabilities

Designed for outdoor use and has fire producing capability. The round may be fired in the air at an angle of 25° - 30° (degrees) to achieve maximum stand off distance, it it may be skip fired into the target area from lesser distances. The smaller scattering effect and the rapid burning of the sub-munition canisters provide a wide area of coverage and minimizes the throwback potential.

Purpose of Equipment

May be used for crowd control or crowd dispersal.

Authorized Equipment Use

Members assigned to the Mendocino County Special Weapons and Tactics Team are authorized to deploy and use this munition upon authorization of the Shift Supervisor, Incident Commander or Crisis Response Unit ((SWAT) Commander, and only after evaluating all conditions known at the time and determining that such force reasonably appears justified and necessary.

Military Equipment Inventory/Acquisition Request Form

☐ **Request for Acquisition of Equipment** ☑ **Equipment Available for Use/Possessed**

Manufacturer Product Information

Manufacturer	Model	Type
Defense Technology	6320	40mm Direct Impact OC Round

Equipment Description

The 40mmDirect Impact® iOC munition is a point-of-aim, point-of-impact direct-fire foam round loaded with oleo-resin capsicum powder, which combines blunt trauma with the effects of an irritant powder, maximizing the potential for incapacitation. The 40mm Direct Impact® OC munition is fired from a 40mm launcher.

Equipment Capabilities

This munition is most effective for incapacitation within its optimal range of approximately 5 - 40 meters, although it may be used in situations from 2 - 50 meters. The optimal zone offers the necessary energy and accuracy to target the large muscle groups of a person and when used properly is less likely to result in death or serious physical injury.

Purpose of Equipment

To minimize risks to all parties through pain compliance, temporary discomfort and/or incapacitation of non-compliant subjects who are violent or when demonstrate the intent to be violent and can be used in an attempt to deescalate a potentially deadly situation.

Authorized Equipment Use

Members assigned to the Mendocino County Special Weapons and Tactics Team are authorized to deploy and use this munition in any circumstance where the member can articulate a reasonable expectation that the munition may be needed to disorientate a potentially violent or dangerous subject.

Legal and Procedural Rules Governing Use

Mendocino County Sheriff's Office Policy 300 Use of Force and 308 Controlled Devices and Techniques.

Training Requirements

Members must have successfully completed agency approved training and meet the qualification requirements prior to deployment and use.

Manufacturer Product Information

Manufacturer	Model	Type
PepperBall	FTC - Full Tactical Carbine	Compression Gas Launcher

Equipment Description

A .68 caliber compressed gas launcher with a 180 round capacity that delivers frangible projectiles filled with oleoresin capsicum, a chemical agent that is non-burning and suitable for indoor use.

Equipment Capabilities

Capable of delivering .68 caliber projectiles up to 100 feet at great accuracy with 7.3 - 11 feet / lbs., of kinetic energy.

Purpose of Equipment

Used to disperse and control incarcerated subjects who are violent or demonstrate the intent to be violent, during riots, refusal to lock-down, or physical altercations. When used properly this system is less likely to result in death or serious physical injury and can be used in an attempt to deescalate a potential deadly situation. Devices are also utilized as a less lethal tool to gain compliance and deescalate combative suspects for Patrol and SWAT Deputies.

Authorized Equipment Use

Assigned Mendocino County Sheriff's Correctional Facility members and SWAT Team Members may deploy this weapon system in any circumstance can articulate a reasonable expectation that the rifle may be needed.

Legal and Procedural Rules Governing Use

Authorized deployment and use of this weapon system may be within the guidelines established in Mendocino County Sheriff's Office Policy 300 - Use of Force and Policy 308 Control Devices and Techniques.

Military Equipment Inventory/Acquisition Request Form

☐ **Request for Acquisition of Equipment** ☑ **Equipment Available for Use/Possessed**

Manufacturer Product Information

Manufacturer	Model	Type
LRAD Cororation	LRAD-100X	Long Range Acoustic Device

Equipment Description

The LRAD-100X is a high intensity directional acoustic array for long range, clear speech, hailing, notification and warning / alert system tone. A type of Acoustic Hailing Device (AHD) that provides communication and warning functions over longer distances and in a much clearer format than traditional public address systems mounted to most vehicles.

Equipment Capabilities

Delivers focused, intelligible, directional broadcasts for targeted communication up to 600 meters with an operational range up to 250 meters over 88 dB of background noise. Delivers clearly heard and understood communications into buildings and vehicles. Provides safe communication beyond standoff distances during crisis situations.

Purpose of Equipment

The purpose of the LRAD is to communicate clear direction to individuals, groups, and victims / bystanders at critical incidents. The Mendocino County Sheriff's Office will not use LRAD warning alert warning system for crowd dispersal or control, as opposed voice commands, during organized protest events with the exception of individuals engaged in felonious behavior.

Authorized Equipment Use

It is the policy of the Mendocino County Sheriff's Office to deploy and use the LRAD to maximize safety of all individuals involved in an incident. The LRAD may be deployed only in events where there is a need to notify the public in large scale evacuations (Fire, Tsunami, Flood Events) or convey information to large crowds, for jailing in events such as emergency Search and Rescue (SAR) operations or during critical incidents crisis negotiations.

Legal and Procedural Rules Governing Use

The LRAD will only be deployed and used under the guidelines established in Mendocino County Sheriff's Office Policy 707 - Acoustic Hailing Device.

Training Requirements

Operators of the LRAD device must successfully complete agency approved LRAD training prior to deployment or use (Mendocino County Sheriff's Office Policy 707 - Acoustic Hailing Device).

Brinc	Lemar S	Unmanned Aerial System (UAS)

Equipment Description

The Lemur S is a medium platform remote controlled aircraft (UAS) built to be easily transported, stored, and prepared for flight and outfitted with an aerial imaging system designed for gathering information through imaging, recording and two-way communication. It has the ability to be outfitted with certain accessories based on mission specific needs to include but not limited to a glass breaker, general purpose payload dropper and door pusher.

Equipment Capabilities

Capable of sustained directed flight and gathering imagery information through outfitted vision enhancement technology that is a no zoom camera. Capable of two-way communication.

Purpose of Equipment

Data collection and communication.

Authorized Equipment Use

Unmanned aerial systems may be utilized to enhance the office's mission of protecting lives and property when other means and resources are not available or are less effective.

Legal and Procedural Rules Governing Use

Any use of an UAS will be in strict accordance with constitutional and privacy rights, Federal Aviation Administration (FAA) Regulations (Mendocino County Sheriff's Office Policy 613 Unmanned Aerial System).
